

# Turtles

Loggerhead  
Oblong  
Green sea  
Hawksbill  
Species

## Diet

Jellyfish  
Sea Urchins  
Crabs  
Sea plants

use strong jaw muscles

## Threats

Boats  
Predators  
Human Activity  
Plastic Bags

Forex  
Humans  
Long line fisheries

## Habitat

estuaries  
sea  
river  
dam/country  
warm shallow seas

## Breeding

eggs often get predated  
nest every 2-5 yrs  
Around October  
Around 5 clutches  
on sandy shores  
clutch = 100-150 eggs

## Appearance

rarely weigh +150 kg

usually more than 2m long

Adults

Shell - hard

darker above but lighter below

Larger heads

prey

predator
