

## BEES Day 2022 – for Years 9, 10 and 11

**Date:** Friday 3<sup>rd</sup> June 2022  
**Location:** Curtin University  
**Cost:** \$4/student

The Biology, Earth and Environmental Sciences Day (BEES Day) is an annual event that showcases some of the exciting career choices and opportunities in science. It is designed to increase students' awareness about real science jobs and encourage them to consider science pathways when selecting subjects at high school.

Presenters from a wide range of industries will share experiences from their work and engage students in hands-on activities. For our 2022 event we are pleased to offer activities and presentations from **North Metropolitan TAFE, Department of Fisheries, Curtin University Earth Sciences, School of the Biological Sciences UWA, City of Perth, South East Regional Centre for Urban Landcare (SERCUL), Perth Natural Resource Management, Perth Zoo, Edith Cowan University, University of Notre Dame and more.**

Representatives from various Perth Universities, TAFE and some private consultants will be available during the lunch break to answer questions and provide materials about opportunities to study science at a tertiary level.

School groups of around 25 students are invited to attend and participate in 4 x 45 minute sessions. If your school would like to register for this event please complete the registration request below and email to: <[pearsonjo@iinet.net.au](mailto:pearsonjo@iinet.net.au)> A booking confirmation letter will be sent on receipt of this registration. You will then receive a list of presentations to select from and every effort is made to accommodate your first and second choices.
